

COVID-19 Testing Requirements

Due to the recent surge in COVID-19 testing requests at our Lake Urgent Care/Lake after Hours locations and limited supply of tests, we are asking patients with recent exposure to COVID-19 and no symptoms to self-quarantine and follow current CDC recommendations including facial masks and good hand washing. We will be able to do send-out swabs to outside labs for patients that still require testing. We will also continue to do the Abbott ID NOW (rapid molecular tests) only for those patients that are high risk and symptomatic.

Remember, **tests are administered by appointment only.** To begin your appointment process, visit www.LakeUrgentCare.com to **“Check-In Now” for an in-person screening or “Schedule a Virtual Visit”** where one of our providers will determine if you meet the CDC’s criteria for the test. Anyone that qualifies for rapid COVID-19 molecular testing during their visit will be scheduled for same-day or next-day testing. This is a part of our initiative to help prevent the spread of COVID-19. Your health and safety is, and always has been, our number one priority.

Let's work together
to create a
HEALTHIER TOMORROW!
